

A Summary Report after Presentation of User Interface Design of the ERP System of BCSAA

To
Deputy Director
Planning & Development

Dear Sir,

According to the schedule from 18.11.2018 to 20.11.2018 we met and discuss with the officers of BCSAA for concern module of the ERP system. During this time we present the prototype of User Interface that we design after gathering primary requirements. For Training Management module we have contact with Dr. Pear Mohammad, Director (Training) and according to his direction we sit with Towhidul Islam, Deputy Director (Training) and Md. Mahmudul Hoque, Assistant Director (Training). We also have contact with A K M Sohel, Director (Administration) and according to his direction we sit with Dr. Rahima Khaton, Deputy Director (Administration) for present HR Management module and Md. Mushfiqur Rahman, Assistant Director (Service) for present Vehicle, Dormitory and Cafeteria Management module. We get feedback and suggestion from above concern officers. The information that we receive from concern officers are describe below.

Towhidul Islam, Deputy Director (Training)

- Training system start with prepare a Training Calendar by Training Wing around March/April of each year. Then Training Calendar send to MoPA for acknowledge. MoPA may send revised of the Training Calendar. Revise process occurs during the year.
- A budget of Training Calendar Year send to MoPA create by Training Wing. This budget must be breakdown in details.
- A nomination list send to MoPA for particular course. Upon getting the list from MoPA then training wing contact with concern person. So Training wing send a request for additional participant to fill up course capacity.
- Training wing setup Course Management Team for each batch of each course. Then Course Coordinator prepare Daily Routine for each course in I week advance. Which is checked by Course Director and Assistant Course Coordinator. But option need to be set to prepare for this schedule for total duration of the course.
- Participant have to appear for a Pre Test Exam on 1st week and Post Test on last week of the course.
 - o Exam Type can be MCQ, Short Question.
 - o Provision of this Exam need to be set Online/Written.
- Marks for each module and evaluation type can be set by Course Coordinator.
- Speakers Honorarium system is session wise where 1 session is 1 hour.
- Class Attendant will take Participant attendance and will input on the system.
- PT Instructor/Games Conductor will have provision
 - o To take attendance with Remarks(Present/Late)
 - o To provide Feedback with Remarks(Most Active/In Active)
 - o To Evaluate participant and provide marks.

- Provision need to be set for Online Exam System for MCQ type or Written type.
 - o Speaker/Course Coordinator will prepare questions and set marks Online.
 - o Speaker/Course Coordinator can examine and evaluate participant's exam paper and assign marks online.
- Online Report Submission System
 - o Speaker/Course Coordinator will ask for submit report on any topics and set last time of submission.
 - o Participant will get notification on their dashboard to submit reports by attachments.
 - o Speaker/Course Coordinator will examine/check report and assign marks online
 - o Participant will get notification on their dashboard after marks assign.
- Developing System should have provision to upload
 - o Videos of Cultural Program by participant
 - o Videos of Mess Night
 - o Videos of Guest Night
 - o Images of Souvenir

Md. Mahmudul Hoque, Assistant Director (Training)

- Soft copy of the sample of Training Calendar, Budget and Daily Routine received.
- Course Coordinator can set Exam schedule for each module where he/she can set exam time and publish time for participant. All users of Course Management team can see this schedule but Participant can see the exam time on their dashboard according to publish time.

Dr. Rahima Khaton, Deputy Director (Administration)

- Employee will filled up all necessary information on the user end of the Employee Management section of HR Module.
- On our proposed system HR Admin will create a user account of the employee so that employee can get access to the system. While creating an employee account HR Admin will provide following information like Full Name, Email, User Role on this system, Password, Employee Number(BCSAA ID), Department, Designation in BCSAA, Designation in MoPA, Govt. ID (BCS Cadre ID), Employment Type, Approving Authority. Other Information like Personal Information, Educational Information, Contact Information etc. will be filled up by employee himself.
- On Holiday Management, Admin will setup Yearly Public Holidays from drop down list predefine before and select date. Our proposed drag n drop system not approved.
- On Leave Management, when an employee will submit a leave application to his approving authority, he should have option to attached supporting documents (single or multiple).
- Leave approving authority of an employee will get notification on his dashboard upon submission of leave application from that employee. Same way applicant will get notification upon leave application approved/rejected.
- Leave approving authority of an employee must see the leave balance of the type of leave that the employee submit and also can see the attachments.
- Leave approving authority of an employee will be set by the employee himself.
- First we need to set the organogram table according to designation, department & no of post. Employee cannot be assign for the same post.

- Leave approving authority of an employee will be varies depend on leave type e.g. for CL type leave Leave approving authority will be one person but for EL type leave will be two or more.
- A Leave substitute table need to be create. Leave substitute (designation + department not by employee name) field need to be add while employee registration.
- Leave algorithm and condition need to be set for all type of leave e.g. Maternity Leave can be take two times in whole employment period. For this we have to check all type of Govt. Leave and their conditions.
- On Promotion Management, when an employee promotes from one designation to next designation his increment is must and Pay Grade also change to higher grade. So a Pay Grade structure need to be set with designation.
- Yearly Pay fixation need to be set on 1st July on every year. By this Employees Pay Fixation/Increment will be auto upon selection.
- Employees' increment can be stop/withheld for a certain period of time upon various cases like DP or any kind of disciplinary matters.
- Internal posting occurs in between BCsAA. In this case employee should have privilege to change his department and designation from his end.

Md. Mushfiqur Rahman Assistant Director (Service)

- For dormitory there are two types of building i.e. Main building and New building. Main building have 5 floors and new building have 15 floors.
- NID & Picture of Room boy need to be taken when room boy registration. More optional data can be taken like Emergency Contact No, Blood Group, Religion etc.
- Room Boy/Dining Boy post are not permanent. Their salary will be collected from deduction of 50TK from participants' daily allowance.
- A Salary table need to be create for Room/Dining Boy. Their Salary system is hand cash and in monthly basis.
- Room Type (Single/Double) need to be set while adding new room. Room Type need to be visible when room assigning for Participant or Room Boy.
- All Room Boys are stays in the dormitory and provide 24 hours support for the room he assign for. There is no shifting system for Room Boy.
- Room Boy are assigning for maximum 6 Single Room or 3 Double Room. But the provision need to be set to assign more rooms.

We are analyzing these above findings with our development team. As per feedback in some cases the User Interfaces will be change and thereby table structure of the database will become change. After these changes we hope we will get back to the concern officers by next week.

Kind Regards
Shafiuddin Haider
